The staff at Paediatric Gastroenterology Victoria are dedicated to providing patients from across the state with the highest quality of care in a friendly and caring manner. We welcome telehealth referrals and have doctors regularly visiting regional Victoria. Our practitioners are committed to staying up to date with the latest research and developments in the field in order to provide the best standard of care to our patients. Our staff also have active research interests and have published their research in peer reviewed journals.

The team has expertise in the diagnosis and treatment of babies, children and adolescents with a wide range of gastrointestinal, liver, nutritional and feeding problems as well as functional disorders.
